- Grades (specie dependent) -** Tight Knot, Select, Clear Vertical Grain
- * Non-resinous - no pitch bleed

Installation Guide

Recommended $1\frac{1}{4}$ " penetration of stainless steel siding screw or nail into wood substrate (sheeting and wall studs) behind siding. For horizontal installation, nail into each wall stud. Vertical installation requires additional blocking every 32" between wall studs. Use 3" trim screw or 10d stainless steel nail provided there is no foam board behind siding.
