 Nickel Gap/Square Edge No Gap
 Nickel Gap has smooth surface
 Square Edge has bandsawn texture
 Available nominal widths 4" or 6"
 .312" overall thickness
 Face width is 3", 5"

Installation drawing enlarged to show details

Recommended 1" or more of penetration of stainless steel siding nail into wood substrate sheathing and wall studs/behind planking. For horizontal and diagonal installation, nail into each wall stud. Vertical installation requires additional blocking every 24" between wall studs.

Use 4d nail provided there is no foam board behind planking.
